

<b>BUSINESS CASE</b>	
<b>Proposed Project</b>	TaskMaster
<b>Date Produced</b>	2021-10-09
<b>Background</b>	We want to make scheduling easier for instructors and students, as historically , students have had long nights of staying up working on assignments in order to get the bare minimum to hand in. And instructors are sometimes only aware of assignments from other classes that cause scheduling problems when students inform them so. We want to be able to close that communication gap. And help instructors communicate with each other, which is currently difficult as there are many instructors and it seems impossible to effectively time one's assignments without the high possibility that the due dates may overlap.
<b>Business Need/ Opportunity</b>	The need provided by this project is the need for better understanding between instructors and students of the workload placed on students from assignments.
<b>Options</b>	-Do not initiate this project -Initiate the project
<b>Cost-Benefit Analysis</b>	
Do not initiate this project <ul style="list-style-type: none"> <li>- Cost:               <ul style="list-style-type: none"> <li>- Our grades in this class</li> </ul> </li> <li>- Benefit:               <ul style="list-style-type: none"> <li>- We don't have to do work</li> <li>- can put more time into assignments from other classes</li> </ul> </li> </ul>	
Initiate the project <ul style="list-style-type: none"> <li>- Cost:               <ul style="list-style-type: none"> <li>- Takes time away from other assignments</li> <li>- Stressful, impact on mental health</li> </ul> </li> <li>- Benefit:               <ul style="list-style-type: none"> <li>- Getting a good mark on the project and in this class</li> <li>- We can use this application in the future outside of this class</li> </ul> </li> </ul>	
<b>Recommendation</b>	
It is recommended that Team Yar should initiate this project
